

Christmas Banner

Supplies:

- 2 pieces of 3-1/2" x 11" cardstock
- 1 piece of 3-1/2" x 10" cardstock (same color as above pieces)
- 15 pieces of 1-3/4" x 3-1/4" DSP (can be all the same pattern or assorted)
- 12" paper cutter w/ scoring blade
- Sticky Strip
- 1-1/4" and 1-3/8" square punches (you can also use the square scallop punch for layering instead of the 1-3/8" square punch)
- Alphabet Stamps & Inkpad(s)
- Ribbons & other Embellishments as desired

Directions:

1. Score the two 3-1/2" x 11" pieces of cardstock as shown in diagram A (2", 4", 6", 8" & 10"). Crease at score lines. Fold Accordion style and cut top two corners evenly to make a tag shape.
2. Score the the 3-1/2" x 10" pieces of cardstock as shown in diagram B (2", 4", 6" & 8"). Crease at score lines. Fold Accordion style and cut top two corners evenly to make a tag shape.
3. Place sticky strip on the 1" strip of the two longer pieces and adhere to make one long banner strip.
4. Cut the top corners of each of the 1-3/4" x 3-1/4" of DSP to make a tag shape. (*Note: the best way to make them even is to make a pattern out of heavy cardstock first*). Glue DSP pieces to banner as desired.
5. Stamp Merry Christmas and punch out letters using 1-1/4" square punch. Punch 15 coordinating pieces of cardstock for layering using a 1-3/8" square punch.
6. Place cardstock squares on each banner section, then layer the Merry Christmas letters on top.
7. Embellish with Ribbons and other items (such as die cut snowflakes) as desired.
